# CamOnQ Video Manager - Platform Solution

## Overview

CamOnQ is a fully integrated digital video storage solution that allows users to easily upload, manage and store **any video type from any camera or device**. Powerful features make it easy to manage and store all your footage in one location until it is marked as evidence or deleted based on the retention and classification you specify.

Since CamOnQ is not tied to a specific camera manufacturer, it provides the freedom to use the video capture solutions you choose and to not be isolated to a single manufacture or device. Ultimately, giving you control and flexibility over all your video device and storage needs.

## Common Classification of Uses and Benefits

**Network Import/Upload:** Upload video over a network or physical connection you specify and store in one easy to access location.

**Manage and Classify:** Use retention codes and classifications to determine how long media should be maintained and when it should be removed or marked as evidence.

**Temporary Storage and Review:** Securely stores all video, from any source, in one easy to access location where it is maintained based on your evidentiary, classification and retention status.

### Manage & View **ALL** Your Evidence in **ONE** Place.

We offer a seamless/integrated way to store, view and manage all your digital evidence from body-worn cameras and more. A single solution that maintains all your evidence in one location. **Ask us how!**

# Key Features

## Import / Secure / Store

### 1. Device Uploads

- a. Upload direct from ANY device or manufacturer, PC or docking station
- b. Wireless network connected uploads
- c. Import large volumes of archival, current, and future media data
- d. Automatic or user triggered uploads

### 2. Mobile Uploads (MDT/MDC)

- a. CamOnQ MDT allows the user to upload videos from the vehicle regardless of connectivity, data will then be transferred to the centralized storage location when a connection is available utilizing patented data transfer technology.
- b. The utility configuration will allow the user to set urgency and type of delivery network (WAN, Cellular...) for every file being transferred, to insure timely delivery and integrity.

### 3. Centrally Located

- a. One-click access to media
- b. Provides a 100% SWGIT compliant and secure repository

### 4. Maintain Original Metadata

- a. Camera make/model, date/time taken, camera settings, image size, GPS location

# Securely View / Manage / Share Media

## 1. Find and View

- Search by name, number, type, date, photographer, and any metadata field
- All media can be dynamically viewed in a detailed thumbnail view
- View meta data of every image
- Simple one-click preview access
- View image in full-screen with zoom in, zoom out and rotation
- View full chain of custody

## 2. Manage Media From a Single Screen

- Edit Metadata
- Annotate
- Classify
- Print

## 3. Share and Distribute

- Fully integrated with physical evidence system (EvidenceOnQ)
- Securely allow remote viewing of selected media or collections related to case
- Approved personnel can view both physical and digital media evidence from one platform for a user specified period of time
- Full chain-of-custody of user activity is tracked

# Classification, Retention & Integration

## 1. Classify Videos

- a. Classification of video can be used to secure access to videos based on user roles
- b. Create your own classification and set a custom retention period
- c. Edit Metadata information on all videos

## 2. Set Retention

- a. Set retention on videos based on classification
- b. Every classification (ie DUI, Use of Force...) will have an associated user defined period of time that will set the expiration day of the video to be deleted
- c. Multiple items can be issued with one transaction

## 3. Evidence System Integration

- a. Videos with evidentiary value automatically identified and managed by the DigitalOnQ / EvidenceOnQ solution

# Other Features/Benefits

## Seamless Integration for Evidence Management

Capture and store all your video in one place until it meets determined retention period and/or needs to be marked as evidence. Video that is identified and marked for evidence will automatically be transferred to the DigitalOnQ and EvidenceOnQ solutions for long term secure storage, management and shared access. Allowing evidence personnel investigators, prosecutors and others to view both physical evidence records and digital media evidence from a single source.

## Security and Compliance

CamOnQ provides a 100% SWGIT compliant and secure repository for all images and video. Image authentication processes are built-in, so original images are always preserved and are tamper-proof. Enhancement tracking shows any edits, processing modifications, or movements made to any media type.

Powerful user access controls allow admins to restrict who can view, access and modify media at any level. For example: Control who has access to features, like upload, burn, print and classify or limit access to certain classifications like internal affairs, juvenile, shootings, homicide, etc.

*Agencies see significant ROI from reduced costs and staff-hours. \*\**
